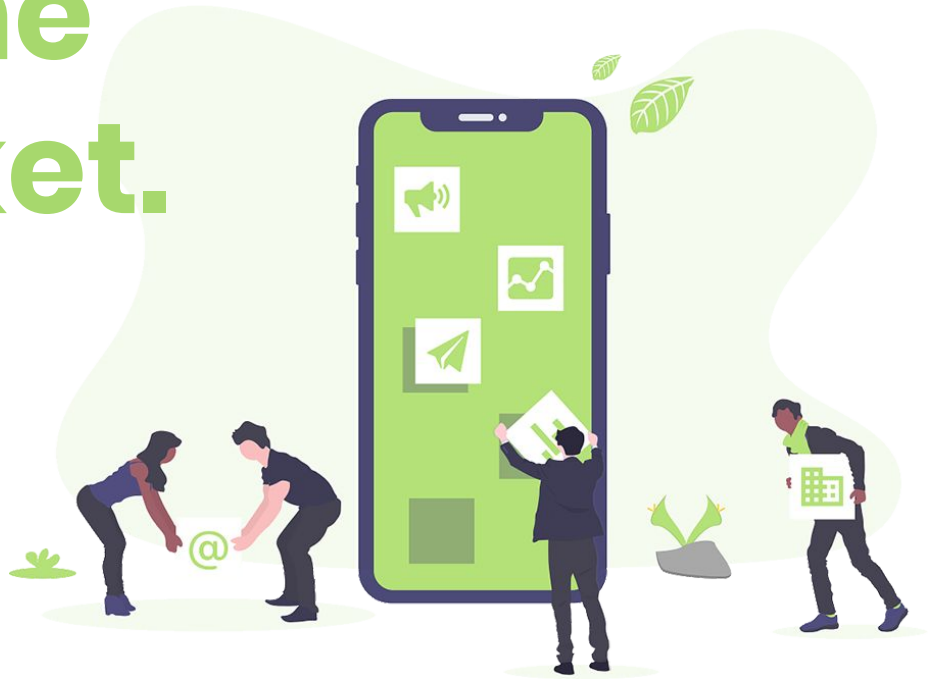
Help job seekers to explore the labour market.

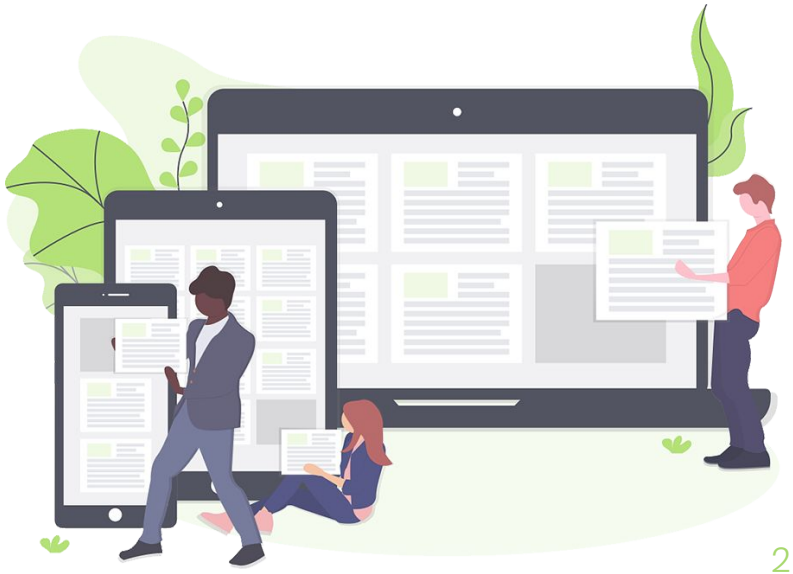


CODING FOR HUMANITY openhack

JOBTECH DEVELOPER

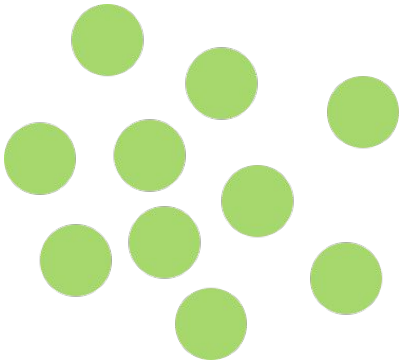
MYTH #1

There are lot of jobs, people should just take one and unemployment will be solved.

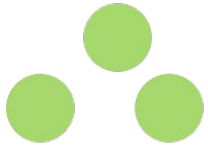


Jobs are getting more specific

Software engineer|



Software engineer python|



Real struggle

I know exactly how my perfect job would look like but there are not enough offers right now.

MYTH #2

The best time to network is after the job has been posted.

https://money.usnews.com/money/blogs/outside-voices-careers/2014/09/17/dont-believe-these-8-job-search-myths

70%

Of job offers are never posted externally.

Referral, networking, spontaneous candidatures...

How might we
help job seekers to find their dream job?

Jobz

One step ahead

by

JOBTECH DEVELOPER

Our process is easy

1. **Scan your CV/Linkedin**
   We analyze your profile and create a skills fingerprint based on your experience and skills
2. **Check best match companies**
   We show you a list of companies that are actively searching profiles like yours in the last few years
3. **Contact companies ahead**
   Through machine learning we identify the companies that are most likely about to start a recruitment process in your field

Demo time!

Future steps

	Done	To be done
Extract data from LinkedIn	**Web scraping**	**Dev API**
JobTech archives data extraction and filtering	**Data subset, Local**	**All data, Data warehouse**
Front end app	**Static query**	**Dynamic query**
Job assistance	**Simple**	**Machine learning**

Thanks!
